# SimaPro Power

SimaPro Power is the most comprehensive SimaPro version. Designed for the expert LCA practitioners and researchers, it contains advanced features such as direct Excel/ASP linking, and its COM interfacing allows you to create dedicated LCA tools.
Connect with other tools

Link SimaPro to other software solutions, and Excel and SQL databases. Or use one of the SimaPro online modules to efficiently collect data, compare LCA scenarios and shows the impact of certain decisions.

Advanced modeling

Build complex, yet transparent LCA models with SimaPro. You can model from a life cycle perspective with uncertainty calculation, process and project parameters, insight in unit processes, allocation of multiple output processes, weak-point analysis and complex waste treatment. The parse feature allows you to import parameter sets from Excel, saving you a lot of work.

Multi-user option

SimaPro's multi-user feature is unique among LCA software solutions. It allows multiple people to work on the same project simultaneously, in one shared central database. Collaborate with your colleagues in real time, even when they are working in different offices or even different countries.

All add-ons in one plan

Collect

Optimize primary data collection

Optimize data collection from suppliers and stakeholders and monitor your data collection progress. SimaPro Collect has a user-friendly dashboard that contains standard survey templates, that are easy to fill out. Power users can also customize the templates to create new surveys.

Share

Create and share scenarios

Create product scenarios and share them with Business users. SimaPro Share allows to interactively evaluate 'what if' scenarios and experience the impact of their decisions first-hand. This streamlines business applications such as product design, EPDs and ISO-compliant studies.

Explore

Explore a large number of scenarios in detail

Create an Explore project linked to your LCA model and set up a questionnaire. Using the questionnaire, you and your Business users can effortlessly create scenarios, compare them to the baseline, and explore the environmental impact of alternative product configurations. This helps product designers and production experts to find the most sustainable design choices.

Create graphs and tables with Report Maker

Save time on creating LCA reports. With Report Maker, you can create graphs and tables in MS Word and MS Excel, and they will be automatically updated as you change your model and data in SimaPro. You can also use Report Maker in combination with the 'Import Scenarios' feature which can help to generate the data for your Environmental Product Declarations (EPDs) or other recurring reports.

SimaPro

SimaPro Power

Advanced modeling and assessment features for comprehensive LCA studies

Robust, flexible and transparent LCA with **SimaPro desktop software**

- Advanced product life cycle modeling with product stages
- Wide range of impact assessment methods included
- Inventory and Input/output databases included
- Interactive results analysis on graphs and tables
- Analysis of groups
- Save inventory data as system processes
- Library switch

- Interactive network view
- Import data (.csv and SimaPro format)
- Export data (.xlsx and .txt format)
- Export data (.csv and SimaPro format)
- Import and export of EcoSpold 1 data
- Export of ILCD Data
- Edit system descriptions
- Interactive tree view
- Parameters (scenario analysis)
- Monte Carlo analysis

- Export to matrix
- Copy chart to Excel
- Multi-user version with shared database, incl. user management
- Hide confidential data
- Wizard development
- Two-way COM interface
- Direct link from inventory to Excel and SQL database
- Excel scenario calculator

Benefits

Add-ons

Features

Price

Optimized data collection and efficient scenario analysis and result sharing with **SimaPro online platform**

Collect

- Create, view and track surveys
- Send customized invites to survey respondents
- Respond to surveys
- Download survey results in .csv format

Share

- Build scenarios
- Calculate and analyze impact assessment
- View, vary and compare ready-made scenarios
- Carry out contribution analysis
- Create hotspots
- Share results with Business users

Explore

- Build scenarios using a questionnaire
- Set up a baseline scenario
- Create a larger number and variety of scenarios (compared to SimaPro Share)
- Copy, edit and compare scenarios
- Calculate and analyze impact assessment
- Share results with (and among) Business users
- Export results in Excel and graphs in PNG
