

SimaPro Craft: LCA software for informed changemakers

SimaPro Craft, previously known as SimaPro desktop, is a powerful software for life cycle assessment of products and services. Widely used in business and academia, SimaPro Craft is the tool of choice for robust life cycle assessment studies. We offer two distinct plans for business: Expert and Power.

Why choose SimaPro

Proven reliability

Backed by over 30 years of expertise and trusted by leading businesses and academic institutions, SimaPro Craft ensures your life cycle assessments are robust and reliable.

Advanced analysis

Access advanced LCA features such as scenario and uncertainty analysis and make use of customization possibilities to tailor the analyses to your specific needs.

Transparent results

Delve into every detail of your life cycle assessment model and results to get insights into environmental hotspots and improvement opportunities.

Expert plan

The Expert plan is designed for the LCA practitioner who needs powerful modeling and assessment features. This version allows you to model detailed LCA studies and use advanced analytical features such as scenario and uncertainty analysis.

Advanced features

The Expert plan supports advanced modeling, scenario analysis and uncertainty calculation with Monte Carlo simulation. Furthermore, you can gain insight into unit processes and the allocation of multiple output processes, conduct a weak-point analysis and model complex waste treatment systems.

Scenarios analysis

Build scenarios with process and project parameters. Using these parameters in your model simplifies your work and gives you the flexibility to easily change values or assumptions in your model.

Multi-user option

The multi-user feature allows multiple people to work on the same project simultaneously, in one shared central database. Collaborate with your colleagues in real time, even when they are working in different offices or even different countries.

Power plan

The most comprehensive SimaPro plan is designed for the expert LCA practitioners and researchers. It contains advanced features such as direct Excel linking, and its COM interfacing allows you to create dedicated LCA tools.

Advanced features

The Power plan includes all the advanced features available in the Expert plan. With this software plan you can perform advanced modeling, scenario and uncertainty analysis. Furthermore, you can gain insight into unit processes and the allocation of multiple output processes, conduct a weak-point analysis and model complex waste treatment systems.

Linking to other tools

Additionally, the Power plan gives you the option to link SimaPro to Excel, thus automating data entry, increasing flexibility to test different assumptions, reducing the margin for error, and making updates more efficient. Moreover, the Power plan offers options to hide confidential data and the possibility to link to other tools by programming the COM interface.

Features overview

Expert plan

Advanced modeling and analysis features

- ✓ Advanced product life cycle modeling with product stages
- ✓ Wide range of impact assessment methods included
- ✓ Inventory and Input/output databases included
- ✓ Interactive results analysis on graphs and tables
- ✓ Analysis of groups
- ✓ Save inventory data as system processes
- ✓ Library switch
- ✓ Interactive network view
- ✓ Import data (.csv and SimaPro format)
- ✓ Export data (.xlsx and .txt format)
- ✓ Export data (.csv and SimaPro format)
- ✓ Import and export of EcoSpold 1 data
- ✓ Export of ILCD Data
- ✓ Edit system descriptions
- ✓ Interactive tree view
- ✓ Parameters (scenario analysis)
- ✓ Monte Carlo analysis
- ✓ Export to matrix
- ✓ Copy chart to Excel
- ✓ Multi-user version with shared database
